Projects

Password Generator

- Description – Responsive JavaScript powered application that prompts user to select password criteria and creates a randomly generated password based on user selections.
- Languages – JavaScript, CSS, HTML
- URL – <https://e-burton.github.io/Password-Generator-JavaScript/>

Code Quiz

- Description – Timed coding quiz with multiple choice questions that tracks correct answers, subtracts time from the clock for incorrect answers, and saves user high score.
- Languages – JavaScript, HTML, CSS
- URL – <https://e-burton.github.io/Code-Quiz-Web-APIs/>

Weather Dashboard

- Description – Weather Dashboard that takes in user input and retrieves the current weather outlook and five-day forecast for city input. Application also features projected Humidity, Wind Speed, and UV Index (with notation for favorable, moderate or severe conditions), as well as search history buttons, which when clicked will again display the current and future conditions for the city.
- Languages – JavaScript, jQuery, HTML, CSS
- URL – <https://e-burton.github.io/Weather-Dashboard-Server-Side-APIs/>
